IN THE SPECIFICATION:

Please amend the text that appears from page 16, lines 7-15, by rewriting the same as follows:

--The process by which the identification and authorization or denial of access takes place in one embodiment may best be envisioned by reference to the flow chart in Figure 7. At start 700, a power key on the wireless device is depressed, 701. The existence of biometric data is assessed, 702. If the biometric data is not programmed, the network administrator identifies the user, 704, and determines if the user is an authorized user, 705. If authorized, the user programs or initializes the appropriate biometric data, 707, and it is stored for future use, 710.--
